Geochim. et Cosmochim. Acta

EDITORS

Dr. L. H. Ahrens, *Department of Geology and Mineralogy, The University, Oxford, England.*

Prof. C. W. Correns, *Sedimentpetrographisches Institut der Universität, Lotzestr. 13, Göttingen, Germany.*

Dr. E. Ingerson, *Geochemistry and Petrology Branch, U.S. Geological Survey, Washington 25, D.C., U.S.A.*

Dr. S. R. Nockolds, *Department of Mineralogy and Petrology, The University, Cambridge, England.*

Prof. F. A. Paneth, F.R.S., *Max-Planck-Institut für Chemie, Mainz, Saarstrasse 23, Germany.*

Prof. L. R. Wager, F.R.S., *Department of Geology and Mineralogy, The University, Oxford, England.*

Prof. F. E. Wickman, *Naturhistoriska Riksmuseets, Mineralogiska Avdelning, Stockholm 50, Sweden.*

I. GENERAL

1. Papers on Geochemistry should be submitted to the editors for the appropriate country or language (*Papers on Cosmochemistry should be sent to Prof. F. A. Paneth, F.R.S.*). Papers submitted for publication will naturally be judged from the standpoint of scientific originality and novelty. Technical details of apparatus used in scientific investigation can, however, be presented in brief notes. Critical comments or preliminary results requiring early publication should be submitted as "Letters to the Editors." Where possible, letters should be confined to 500 words. The preparation of progress reports and review articles will be invited by the Editors from time to time. The Journal will appear as independent and complete numbers, which will be sold separately and combined into volumes of about 300 pages.

2. Only papers which have not been previously published will be accepted. Authors must agree not to publish elsewhere a paper submitted to and accepted by *Geochimica et Cosmochimica Acta.*

3. Fifty reprints of each paper are provided free. Additional copies can be purchased if ordered at the time the first proofs are returned.

II. MANUSCRIPT REQUIREMENTS

1. The manuscript must be written in one of the three official languages, English, French, or German.

2. The manuscript should be an original typewritten copy (not a carbon). The text must be ready for printing and should be carefully checked for errors. Authors will receive proofs for correction.

3. Half-tone illustrations should be restricted to the minimum necessary. They should accompany the manuscript mounted on separate sheets. Line drawings that require to be re-drawn should include all relevant details. Photographs should be enlarged sufficiently to permit their clear reproduction in half-tone. If words or numbers appear in photographs, two copies are requested, one clearly printed and the other without inscription. All illustrations should be provided with descriptive legends, which should accompany the manuscript on a separate sheet.

4. References in the text should be given by quoting the author's name and year of publication, i.e. Ahrens (1952). **Full references should be listed at the end of each paper, in alphabetical order, in the following manner:**

Ahrens, L. H. (1952) *Geochim. et Cosmochim. Acta* **2**, 168

and should include the standard abbreviated title of the journal, year, volume number and page number.

5. The text of articles submitted should be concise and in a readily understandable style. The technical description of the methods used should only be given in detail when such methods are new. The essential contents of each paper should be briefly recapitulated in an abstract in English. Such an abstract may, however, be submitted by the author in the language of the original typescript for translation into English by the editorial staff.

6. To conserve space authors are requested to mark less important portions of the paper (such as description of methods, record of experimental results, etc.) for printing in smaller type.

CONTENTS

Nos. 1/2

Page

L. H. AHRENS: Implications of the Rhodesia age pattern 1

H. A. SHILLIBEER and R. D. RUSSELL: The argon-40 content of the atmosphere and the age of the earth 16

I. I. CHEBOTAREV: Metamorphism of natural waters in the crust of weathering. Part I 22

H. BORCHERT: Die häufigsten Elemente im Durchschnitt der Eruptivgesteine . 49

R. L. MILLER and EDWARD D. GOLDBERG: The normal distribution in geochemistry 53

IRVING A. BREGER: Radioactive equilibrium in ancient marine sediments . . 63

J. A. S. ADAMS: The uranium geochemistry of lassen volcanic National Park, California 74

VINCENT A. SAULL: Chemical energy and metamorphism 86

Announcements 108

In Memoriam 108

No. 3

R. J. W. MCLAUGHLIN: Geochemical changes due to weathering under varying climatic conditions 109

F. M. BREWER, J. D. COX and D. F. C. MORRIS: The occurrence of germanium in blende 131

I. I. CHEBOTAREV: Metamorphism of natural waters in the crust of weathering. Part II 137

G. W. WETHERILL, L. T. ALDRICH and G. L. DAVIS: A40/K40 ratios of feldspars and micas from the same rock 171

No. 4

E. M. PATTERSON and D. J. SWAINE: A petrochemical study of Tertiary tholeiitic basalts: The Middle Lavas of the Antrim Plateau 173

S. R. TAYLOR: The origin of some New Zealand metamorphic rocks as shown by their major and trace element composition 182

I. I. CHEBOTAREV: Metamorphism of natural waters in the crust of weathering. Part III 198

HIROSHI ONISHI and E. B. SANDELL: Notes on the geochemistry of antimony . 213

Book Reviews:

"Gmelins Handbuch der anorganischen Chemie" (reviewed by C. W. CORRENS) . . 222

"Quantitative Spectrochemical Analysis of Silicates" by L. H. AHRENS (reviewed by R. L. MITCHELL) 222

Announcement 223

H. S. Yoder and H. P. Eugster: Synthetic and natural muscovites . . . 225

Ralph E. Weston, Jr.: Hydrogen isotope fractionation between ice and water . 281

George Edwards: Sodium and potassium in meteorites 285

L. F. Herzog and W. H. Pinson, Jr.: The Sr and Rb contents of the granite G–1 and the diabase W–1 295

Letters to the Editors:

L. H. Ahrens: Analytical error as a possible cause of the $t(\frac{206}{238}) > t(\frac{207}{235}) > t(\frac{207}{206})$ age distribution 299

A. A. Smales: Some trace-element determinations in G1 and W1 by neutron activation . 300
